ICOMOS

ICOFORT goals:

- Promote awareness of the structures, landscapes and monuments and to promote the conservation and maintenance of these structures.
- Be available to help achieve ICOMOS his role as advisor to the UNESCO World Heritage Site.
- Conduct specialized studies and encourage the application of professional experience
- Active pursuit of international cooperation for the identification, protection and preservation

ICOMOS Guidelines on Fortifications and Military Heritage (adopted per Resolution AGA 2021/10)

PREAMBLE

Humans have constructed fortifications and military heritage using a variety of complex designs for thousands of years.

Surviving fortifications and military heritage from distant past to recent times have served as a major link to the history of human settlements, nations, and regions. At the same time, the use of these monuments and sites as elements of power projection remain a painful physical reminder for many communities. Understanding and respecting these memories and consequences from the perspective of these communities can generate new identity references that positively re-signify the relationship between population, fortifications and military heritage.

ICOFORT

International Scientific Committee on Fortifications and Military Heritage

ICOFORT guidelines:

Principles

- Historical Constructive Evolution, Stratigraphic and Spatial Complexity of the Structure
- External functional scope beyond its physical boundaries
- The lack of knowledge of the formal and functional characteristics of the fortification can be much greater than for other types of heritage structures
- Fortifications and Communities
- Fortifications use and re-use
- Fortification and urban landscape and territorial dimensions
- Fortifications are not typical buildings

ICOFORT guidelines:

Values:

- Architectural and Technical value.
- Territorial and geographical value
- Cultural Landscape Value
- Strategic Value
- Human and Anthropological Value
- Memory, Identity, Educational Value
- Historic value
- Social/Economic Value

ICOFORT guidelines:

Intervention parameters:

- All interventions should be based on a Master Conservation Plan
- All interventions should be based on the holistic integration of the values of the site in relation to the defensive systems and surroundings
- All interventions must be compatible with the elements and characteristics of the fortifications and military heritage in accordance with the Zimbabwe Charter and in relation to the Vitruvian Triad: “Firmitas, Utilitas et Venustas”
